

ACOFI

We finance your energy

ABOUT US

We are a cultural association that connects **international investors with high-potential projects** in the energy, industrial and financial sectors, using alternative instruments and channels to those of traditional banking.

We operate through innovative financial structures such as securitisations, AMCs (Asset Management Companies) and SPVs (Special Purpose Vehicles), with the aim of facilitating the development and implementation of strategic projects across various sectors: renewable energy, industry, hospitality, real estate, pharmaceuticals and business development.

Our mission is to transform ideas and assets into concrete opportunities, promoting sustainable growth, innovation and access to international capital.

Martina Galvagno
Office Assistant

Anna Gloria Testoni
Strategic Partner

STRATEGIC CAPABILITIES

ACOFI develops and structures investment opportunities through structured finance instruments and securitisation transactions applied to high-potential projects, with a particular focus on large-scale energy infrastructure, real assets and initiatives that can be transformed into efficient and scalable financial vehicles.

Through the use of Special Purpose Vehicles (**SPVs**), Asset Management Companies (**AMCs**) and other dedicated structures, we transform complex assets into investment opportunities accessible to professional and institutional investors, ensuring high standards of governance, transparency and oversight.

Our model also incorporates the strategic and prudent use of leverage.

A portion of our resources is allocated to government bonds and low-risk assets designed to preserve capital, whilst another portion is allocated to proprietary quantitative strategies developed to generate returns that are uncorrelated with traditional markets.

This approach allows us to combine capital *protection, financial efficiency and returns*, creating innovative, diversified and long-term investment solutions.

THE ACOFI ADVANTAGE

1. Access to real and infrastructure assets

We invest in the real economy through carefully selected projects offering high added value, with a particular focus on energy infrastructure and strategic assets.

2. Advanced Structured Finance

We use SPVs, AMCs and securitisation instruments to create efficient, transparent and scalable structures for professional investors.

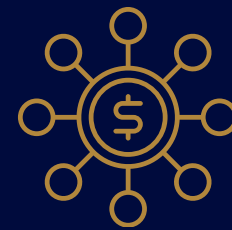

3. Capital Protection

Our model includes a portion allocated to government bonds and low-risk assets, with the aim of preserving capital.

4. Strategic Diversification

We combine real assets, structured finance and systematic strategies to optimise the risk/return ratio.

5. Decorrelated Quantitative Strategies

Proprietary quantitative systems designed to generate returns that are uncorrelated with traditional markets through rigorous risk management.

6. International Network

We work with institutional investors, family offices, professionals and strategic partners on an international level to foster growth and co-investment opportunities.
